

Project Brief: LipCoding AI Assistant

Overview

LipCoding is a personal productivity assistant that captures notes, tasks, and events using text, voice, and file input. AI processes and organizes everything automatically.

Timeline

- MVP completion: July 1, 2026
- Beta testing: July 15, 2026
- Production launch: August 1, 2026

Action Items

- Complete multimodal input implementation by June 25
- Deploy to Azure Container Apps by June 28
- Write user documentation by June 30
- Schedule demo with stakeholders for next Friday

Budget

Azure infrastructure budget: \$500/month estimated.

Need CFO approval before provisioning Cosmos DB — follow up by end of week.
